Willamette Humane Society (WHS) agrees with The American Veterinary Medical Association (AVMA) in discouraging the declawing of cats. As the AVMA position Read:

Declawing of domestic cats should be considered only after attempts have been made to prevent the cat from using its claws destructively or when its clawing presents a {health} risk for its owner(s).

*Scratching is a normal feline behavior. It is a means for cats to mark their territory both visually and with scent, and is used for claw conditioning ("husk" removal) and stretching activity.

*Appropriate claw care (consisting of trimming the nails every 1 to 2 weeks) should be provided to prevent injury or damage to household items. Surgical declawing is not a medically necessary procedure for the cat in most cases. While rare in occurrence, there are inherent risks and complications with any surgical procedure including, but not limited to, anesthetic complications, hemorrhage, infection and pain. (source:www.avma.org;edited for brevity)

Please Know that several alternatives exist to declawing a cat:

*Soft tips, such as SoftPaws brand, are plastic covers for your cat's nails. They are applied with nail glue and should last 4-6 weeks. You can purchase SoftPaws at Davenport's Den, the retail store located in and benefitting the shelter, or area pet supply stores.

*The Willamette Humane Society almost always has declawed cats available for adoption.
